

Natural resources services

Minimum requirements

Some aspects of this work type require that staff completing the work hold a specific license or certification.

Description

Includes the completion of one or more of the services listed below:

- Rare and endangered species surveys according to MN DNR and federal pre-certifications and standards
- Sensitive plant and animal species surveys according to MN DNR and federal pre-certifications and standards
- Land cover classifications/assessments utilizing the MN DNR Ecological Classification System, Minnesota Land Cover Classification System or other methodologies subject to approval of Hennepin County
- Floristic quality assessments
- ArcGIS Project creation including digitization and geodatabase creation
- Natural resources protection, restoration and/or enhancement projects and installation

Typical services

Project deliverables may include the following:

- Design specifications, data, reports, maps, and other documentation of the results of the services listed in Section I
- Supporting documents used to conduct the services and complete the reports including, but not limited to ArcGIS projects and associated databases
- Documentation of required certifications, where applicable
- Completion of regulatory reporting requirements, if required
- Meeting attendance, as required

- Properly trained and certified staff as required by federal and state statutes and regulations and/or Hennepin County policy
- Proper equipment necessary for the completion of the assigned task(s)
