

## **Work Type Definition: Natural Resources Services**

### **I. Minimum requirements**

Some aspects of this work type require that staff completing the work hold a specific license or certification.

### **II. Description**

Natural Resources Services includes the completion of one or more of the services listed below.

- A. Rare and endangered species surveys according to MN DNR and federal pre-certifications and standards
- B. Sensitive plant and animal species surveys according to MN DNR and federal pre-certifications and standards
- C. Land cover classifications/assessments utilizing the MN DNR Ecological Classification System, Minnesota Land Cover Classification System or other methodologies subject to approval of Hennepin County
- D. Floristic quality assessments
- E. ArcGIS Project creation including digitization and geodatabase creation
- F. Natural resources protection, restoration and/or enhancement projects and installation

### **III. Provided by consultant**

Typical deliverables supplied by the consultant and including project requirements may include, but are not limited to the following:

- A. Design specifications, data, reports, maps, and other documentation of the results of the services listed in Section I
- B. Supporting documents used to conduct the services and complete the reports including, but not limited to ArcGIS projects and associated databases
- C. Documentation of required certifications, where applicable
- D. Completion of regulatory reporting requirements, if required
- E. Meeting attendance, as required
- F. Properly trained and certified staff as required by federal and state statutes and regulations and/or Hennepin County policy
- G. Proper equipment necessary for the completion of the assigned task(s).
