Start composting in your backyard

Food scraps are a resource, not a waste!

Start recycling your food scraps and yard waste into compost, right in your own backyard. Composting is one of the best opportunities to reduce our trash — about 25 percent of what we throw away is organic materials like food, napkins and paper towels that could be put to better use as compost. Attend a free workshop to help you get started.

Attend a free backyard composting workshop

Learn how to set up your compost pile, what materials you can compost, how to get the mix right, and more from Composting and Recycling Specialist, Kira Berglund.

Learn more about backyard composting and register to attend a workshop at hennepin.us/composting.
