

Marshall Street reconstruction

County Road 23 in Northeast Minneapolis

Project information

Hennepin County is planning to reconstruct Marshall Street (County Road 23) between 3rd Avenue and Lowry Avenue (County Road 153) in Northeast Minneapolis. The county seeks to replace aging infrastructure and improve safety and comfort for people walking, biking, rolling and driving along the corridor.

In 2018, Hennepin County conducted a corridor study which resulted in the recommendation of a two-way off street cycle track through the corridor, as well as reallocation of space for people walking, rolling, biking, and driving.

Project goals

Hennepin County seeks to achieve the following goals:

1. Create safe spaces for all users
2. Plan for accessible, continuous and separated bikeways and sidewalks
3. Develop sustainable parking solutions
4. Strengthen connections to Marshall Street businesses and destinations
5. Balance needs for all modes of transportation
6. Improve access to the river and green spaces
7. Improve transit connections
