

# Osseo Road reconstruction

Community engagement summary | November 2019 - February 2020

**65**  
Survey responses

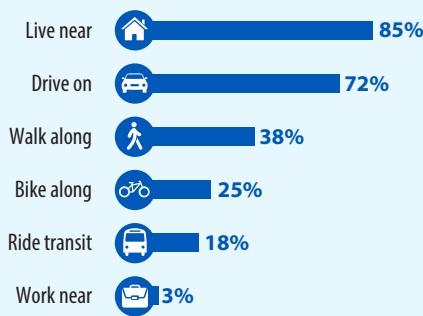

**232**  
Social media interactions

**270**  
Face-to-face interactions

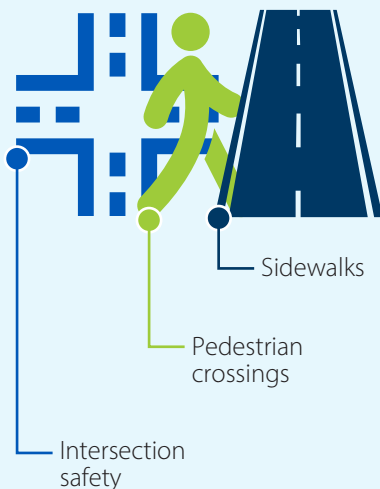

## Who took the survey

People identified their relationship to Osseo Road (County Road 152)

## Top three priorities

People identified their top three priorities for improvement

Here are the top concerns and suggestions we heard from residents and business owners during our engagement efforts:

CONCERNS	COMMUNITY SUGGESTIONS
<b>Walking and bicycle safety</b>	
People don't feel safe walking or biking along Osseo Road	Improve sidewalks, crosswalks and bike lanes
Improvements are needed at the curved intersection of Osseo Road and 44th Avenue to make it safer for all	
Many people are not using the staircase or don't know about it	Move the staircase near the intersection and/or change it into a paved winding path
People often cross at non-intersections of Osseo Road to get to the dog park	Find alternatives to improve people's access to the dog park and to safely cross Osseo Road
There are too many cross streets at the Parkway	Consider redesigning cross street intersections to improve safety
<b>Traffic calming</b>	
There have been several vehicle crashes and near-miss accidents at several intersections along Osseo Road	Look at several traffic calming methods including more speed enforcement, improved driver awareness of speeds and enhanced traffic signal operations
Some drivers use the center turn lane as a passing lane	Better enforcement of center turn lane
<b>Streetscaping</b>	
People only feel safe crossing Osseo Road at the parkway since it's the only place with lighting	Improve the area around the road with streetscaping (i.e. lighting) and placemaking
<b>Transit improvements</b>	
Improve bus stops along Osseo Road	Add enclosed bus stops/stations, better lighting and heating
	Install Bus Rapid Transit stations between Penn and 49th avenues
